

Glass and crystals detergent specific for usage with squeegee stick

GENERAL ASPECTS:

D15C is a concentrate degreasing detergent for glass and crystals, specific for usage with squeegee stick. The usage of D15C helps the sliding of the squeegee rubbers on the surfaces. The effect is a perfectly clean surface, transparent, shiny and with no streaks.

INSTRUCTIONS FOR USE AND APPLICATION FIELDS

D15C is used for heavy duties cleaning operations of glasses and glass windows when the amplitude of the surface, or the high degree of dirt present on them, require the usage of a squeegee.

In those cases the use of D15C is indispensable to make the cleaning operation faster and less tiring.

D15C is also recommended for the cleaning of the glasses of motor vehicles or other means of transport: in this case it can be used with an hand squeegee or added to the water in the tank.

Prepare a solution of D15C to 0.3-0.5% in water (30-50 ml D15C of 10 litres of water).

Apply the solution on the glass with the appropriate window washer.

Pass the squeegee proceeding by parallel stripes, in vertical direction from top to bottom and horizontally from left to right, trying to keep the wiper in a position slightly tilted to the side for allow rapid drainage of dirty cleaning solution.

During the operation, frequently clean the rubber blade wiper with a chamois leather. Drying corners or the frame of the windows or windows with buckskin.

Avoid working under direct sunlight.

COMPOSITION

nonionic surfactants and anionic surfactants, sequestrants, foam stabilizers, dyes

APPEARANCE	transparent liquid turquoise
ODOR	lemon scented
SPECIFIC GRAVITY	1
PH	8.5
SOLUBILITY IN WATER	Complete
BIODEGRADABILITY	complies with EC Reg 648/2004

TYPE OF DANGER AND CAUTION ADVISE:

The product is not to be considered dangerous

FURTHER INFORMATION

ONLY FOR PROFESSIONAL USE .

PACKING

D15C is available in cartons with 4 plastic cans of 5 lts.
