

Dry foam shampoo for moquettes and carpets

GENERAL ASPECTS:

M201C is a concentrated shampoo for carpets rugs that develops a stable and plenty active foam and leaves a dry friable residual , easily removable by vacuum.

M201C foam is rich in active substances that work in depth by removing dirt, dragging it to the surface and keeping it in suspension.

M201C has excellent retardant properties that prevent the carpet from getting dirt because it contains special resins that avoid the rapid re-deposition of dirt on the fibers.

M201C has an excellent deodorizing power.

APPLICATION FIELDS

M201C is used for washing moquettes and carpets with the method of shampooing. This can be done manually on small areas of carpet, or with single disc machine for a deep wash of very dirty moquettes, or finally with shampooing machine for frequent washing of dirty carpets that cannot be over wet (carpet in wool, carpets with bottom in jute or foam rubber).

INSTRUCTIONS FOR USE

To make a proper shampooing is recommended to act according to the following schedule:

- Protect the legs of furniture with a plastic sheet, adhesive tape, aluminum foil or other protective films.
- Dilute M201C 10% with water (1 liter of shampoo every 10 liters of water). Check the resistance of the color in a hidden area of the carpet.
- Apply the solution by hand, or with single brush or shampooing machine.
- Do not leave the single brush wet on the carpet after use.
- Be careful not to over wet the carpet if it is in wool, or has the bottom in jute or rubber foam.
- Wait drying. - Draw with vacuum cleaner the residue of crystallized foam and dirt. - Brush the carpet in the opposite direction to the hair, to straighten and lift.

COMPOSITION

COMPOSITION	anionic and non ionic surfactants, water-soluble solvents, sequestering agents, perfumes
APPEARANCE	colorless transparent liquid
ODOR	lemon essence
SPECIFIC GRAVITY	1
PH	11 ± 0.5
SOLUBILITY IN WATER:	Complete
BIODEGRADABILITY	all surface-active agents meet the requirements of aerobic biodegradability set out in Annex III of Regulation (EC) No 648/2004

FURTHER INFORMATION

ONLY FOR PROFESSIONAL USE .

TYPE OF DANGER AND CAUTION ADVICE

The product is not considered dangerous.

PACKING

M201 is available in cartons with 4 plastic cans of 5 lts.
