

ST31F

Rinse agent for dishwashing machines

GENERAL ASPECTS:

ST 31F is a brightening agent, low foaming, which is used as rinse additive in the washing process of professional and semi-professional dishwashers.

ST31F is particularly suitable for washing in the presence of hard water (hardness above 25 ° F) and for dishwashers with not demineralized water.

ST31F removes water stains on crockery and glassware due to water hardness , it removes detergent residues that are deposited on the dishes during the washing phase and facilitates drying .

ST31F makes plates, dishes and glasses perfectly bright and protects the dishwasher from scale formation due to the hardness of the washing water.

APPLICATION FIELDS AND INSTRUCTIONS FOR USE

ST31F is used as an additive to rinse in presence of hard water, for machine washing of crockery, cutlery and glasses in the kitchens of restaurants, hotels, communities, canteens, schools, hospitals

In the table it is indicated the dosage in function of water hardness:

DOSAGE	Water hardness in French degrees	Grams of ST31F per litre of water
	MEDIUM 16 –25 °F	0.3
	HARD (over 25 °F)	0.5/1

COMPOSITION

COMPOSITION	water soluble solvents, organic acids, non-ionic surfactants
PHYSICAL ASPECT	slightly blue transparent liquid
SPECIFIC WEIGHT	1.02
PH	1.5
WATER SOLUBILITY	complete
BIODEGRADABILITY	Conforms to EC Reg 648/2004

TYPE OF DANGER AND CAUTION ADVICE

The product is not considered dangerous

FURTHER INFORMATION

ONLY FOR PROFESSIONAL USE.

PACKING

ST31F is available in tank 1x20lt.
