Hi-cleaning^{*} Solutions

3 of 5

Very tenacious and stubborn dirt is generated from hard industrial processing.

Therefore, within the Industrial line, a series of strong and safe products for the Manufacturing Sites sector were selected and enhanced by the Sutter Professional laboratories.

A range consisting of alkaline detergents, degreasers, acids and anti-statics to fight stubborn dirt on various types of surfaces and materials.

A specific range for the Manufacturing Sites

**Strong against
dirt, safe
for humans
and the
environment**

Through research and innovation, Sutter Professional laboratories have developed new formulas for products able to fight the most stubborn dirt, such as that resulting from industrial processing and craftsmanship. The result is the Industrial line, with a range of specific and effective cleaning products for equipment and Industrial, Agricultural and Food and Transportation sectors.

Sutter

Hand washing

a complete line certified by Sutter Professional

We give special attention to market needs

A thorough market research in the relevant industry field has highlighted that nowadays the CAPTIVE system is used a lot. Its advantages are noteworthy: it is easy to use, the product can be used until it is finished, a sealed pouch avoids contact with the outside, the exhausted pouch can be easily replaced and costs can be greatly reduced. These are the reasons why Sutter Professional has improved and simplified the Captive system, by means of cream, gel and foam soaps: they are Ecolabel certified and disinfectants* and are provided in customized dispensers. Our line is:

INNOVATIVE

Sutter Professional has created a new line of soaps for hand washing and disinfection which cares about people and environment in accordance with the regulations in force for biocides, cosmetics and Ecolabel certified products.

EXCLUSIVE

The dispenser has been designed according to a Sutter Professional patent and customized with the Sutter Care brand to emphasize the desire to create an exclusive identity for this new line of hand-washing soaps.

TECHNOLOGICAL

The dispensers used for 800 ml pouches are equipped with a "captive" system (with selective insertion system) which has been especially created for Sutter Professional products and is aimed at avoiding any mistake during assembling.

SAFETY

The cream, gel and foam hand soaps are guaranteed and certified for any specific application. The pouch (800 ml) is hermetically sealed to ensure that the product can not be contaminated by external contact or by bacteria found in the environment.

ECOLOGICAL

The polyethylene pouch can be easily detached from the dosing pump, allowing for an easy recycling of each component. The Ecolabel certification ensures further protection for both people and environment, since it guarantees that the product has been made using environmentally friendly raw materials.

EASY

Installation of the Sutter Care dispenser and replacement of the 800 ml pouch are both very easy. The dispenser can be easily cleaned and it is both shock and corrosion proof.

COMPLETE

The Sutter Care line offers a wide range of hand-washing products which are available in multiple sizes and for different specific needs.
